EVAN EARLE

Full Stack Developer | React, Next.js, Node, Express, MongoDB, SQL, Javascript, Typescript, REST APIs

SUMMARY

Full stack developer seeking minimum five-week work term in April 2025. Experienced with React, Next.js, Redux, Node, Express, MongoDB, SQL, Javascript, Typescript, HTML, and CSS. Skilled in building APIs and working with both large-scale projects and building smaller applications from scratch. Comfortable working independently or collaborating in teams with several years of experience working remotely.

WORK EXPERIENCE

Developer Mentorship/Specialist Banking Services | ADP Canada, Halifax, NS

2022 — Present

- Developed corporate-wide, internal full stack web application using Angular, Typescript, Java, SQL with Global Product & Technology (GPT) at Fortune 500 company in addition to main duties with the banking department
- Completed Angular, Typescript, and SQL courses at the request of GPT
- Built and tested Angular components on the front-end, calling the Java API on the back-end to serve data from the SQL database
- Worked with a senior developer to deliver PWRs (project work requests) from various departments which included editing components and fixing bugs

Accountant | Baker Tilly (Windsor, ON), Northview Consulting (Halifax, NS)

2017 — 2022

- Prepared financial statements for a wide range of businesses and nonprofits
- Analyzed client financial records to ensure accurate recording and compliance
- Completed financial audits for clients on site and prepared personal and corporate tax returns

Business Analyst/QA Lead/SCRUM Master | Content Bloom Inc, Halifax, NS

2015 — 2017

- Participated in requirement gathering workshops abroad and maintained client relationships
- Collaborated with developers and oversaw SDLC of SaaS projects as scrum master
- Led quality assurance team on major web development projects; executed test cases and evaluated product code while adhering to the Scrum methodology
- Completed content entry at the request of clients using HTML/CSS through a CMS
- Prepared periodic metric reports for stakeholders

Financial Services Rep | Atlantic Edge Credit Union, St. John's, NL

2013 — 2015

- Provided client services including credit counseling and sales of financial products and services
- Managed daily, weekly, and monthly duties including company receivables, payables, member file audits, investment portfolios, income tax returns, and maintaining office inventory

Projects:

Full Stack MERN Developer | Freelance

2019 — Present

- Completed full-stack, fully responsive web development projects using React, Express, Node, MongoDB, REST APIs, CRUD operations, and dozens of other tools and frameworks
- Continuous learning of full stack web development in the MERN stack for consistent, measurable growth as a developer
- Developed over 50 web application projects in total

Diagnosix.ai | Full Stack AI Application — 2024

- AI-powered medical web application designed for healthcare professionals to perform differential diagnoses
- Built with Next.js, MongoDB, OpenAI API, Auth.js, and Tailwind CSS
- Developed a custom email verification flow with dynamic templates to onboard users securely
- Optimized API response structure for concise and relevant outputs, incorporating advanced formatting to present differential diagnoses and recommended tests in a user-friendly manner
